- A. In longitudinal studies of the panel variety, the researcher may study the different people over time
- B. Are repeated over an extended period
- C. The panel or sample remains relatively remains constant through time and the sample members in a panel are measured repeatedly
- D. B and C

ANSWER: A

32._____ the one in which two variables fluctuate together but we assume the changes in neither variable is due to changes in the other.

- A. A symmetrical relationship
- B. A reciprocal relationship
- C. With asymmetrical relationship
- D. A & C

ANSWER: A

33.Which one of the following is concerned with how one variable affects changes in another variable and it also focus in understanding, explaining, predicting and controlling relationship between variables

- A. Primary data

- B. Experimentation
- C. Causal studies
- D. All of the above

ANSWER: C

34. Which one of the following is defined as the act of examining a process or questioning a selected sample of individuals to obtain data about a service, product, or process?

- A. Questionnaire
- B. Interview
- C. Survey
- D. Observation method

ANSWER: C

35. _____ is any subset of measurements selected from the population

- A. Population
- B. Census
- C. Parameter
- D. Sample

ANSWER: D

36. Which one of the following is the category of non-probability sampling method?

- A. Quota sampling
- B. Judgement sampling
- C. Convenience sampling
- D. Snowball sampling
- E. All of the above

ANSWER: E

37. Which one of the following should include a brief background of the area of study and the problem, summary of the pertinent literature to orient readers and indicate the gaps in knowledge?

- A. Summary
- B. Introduction
- C. Abstract

D. Research methods

ANSWER: B

38. Which of these is not one of the constraints of a project?

- A. Scope
- B. Resources
- C. Team
- D. Budget

ANSWER: C

39. The project idea must be compatible with

- A. Interest of entrepreneur
- B. Personality of entrepreneur
- C. Resources of the entrepreneur.
- D. All

ANSWER: D

40. Which of the following is not correct about initial phase of a project?

- A. The cost associated at the beginning of the project is highest.
- B. Stakeholders have maximum influence during this phase
- C. The highest uncertainty is at this stage of the project.
- D. All the above statements are correct.

ANSWER: A

41. Who is the focal point or information center to the project in line and staff organization?

- A. Project sponsor
- B. Steering Committee
- C. Project coordinator
- D. Project Promoter

ANSWER: C

42. Among the forms of project organization in which one authority is shared between the project manager and the functional managers?

- A. Line and staff organization
- B. Matrix Organization
- C. Divisional Organization

D. All

ANSWER: C

43. Which one is not important in searching project idea?

- A. Suggestions of financial institutions
- B. Governmental Guidelines
- C. Review of import statistics
- D. Analyzing Performance of Existing Industries
- E. None

ANSWER: E

44. One is the reason for poor control of projects.

- A. Clarity of the project
- B. Management Competency
- C. Delay in reporting performance
- D. Reliable information

ANSWER: C

45. The firm current ratio is 2 times and its total current asset amount equals to Birr 1,475,000.

How much the firm current liability Birr amount?

- A. 950,000 Birr
- B. 325,000 Birr
- C. 737,500 Birr
- D. 842,125 Birr

ANSWER: C

46. Assume the annual gross profit amount is 35% of its annual sales and the sales amount is 4000,000 Birr. How much the company total cost of goods sold Birr amount?

- A. 1,640,000 Birr
- B. 404,000 Birr
- C. 1,400,000 Birr
- D. 2,600,000 Birr

ANSWER: D

47. Mr. John has been given the opportunity to receive birr 10,000 four years from now. If he can earn 10% on his investment, what is the amount that would make him indifferent if he is to receive the amount as of today?

- A. 8456.33 Birr
- B. 7423.45 Birr
- C. 7980.00Birr
- D. 6830.13 Birr

ANSWER: D

48. Consider that MM Corporation on Jan1, 2010 issued a 10% coupon interest rate, 10 year bond with Br 1000 par value that pays interest annually. If the investor requires a 10% rate of return on this bond. What is the value of the bond to such an investor?

- A. 1200 Birr
- B. 1235 Birr
- C. 1000 Birr
- D. 870 Birr

ANSWER: C

49. Which of the following is true?

- A. If $YTM > K_c$ the bond sells at discount below par value
- B. If $YTM < k_c$ the bond sells at premium above par value
- C. If $YTM = k_c$ the bound sells at par value
- D. All of the above

ANSWER: D

50. Consider a common stock that paid a \$ 5 dividend per share at the end of the last year and is expected to pay cash divided every year at a growth rate of 10%. Assume the investor's required rate of return is 12% .what would be the value of the stock?

- A. 365 Birr
- B. 275 Birr
- C. 398 Birr
- D. 423 Birr

ANSWER: B

- 51.** Which of the following is **not true** about capital budgeting evaluation decision criteria?
- A. Profitability index greater than one, Accept the proposed project
 - B. Net present value is positive, Accept the proposed projects
 - C. Mutually exclusive projects, Accept the higher net present value projects
 - D. For Mutually exclusive projects, Accept the shorter payback period project
 - E. Profitability index method, NPV greater than the initial project cost is rejected

ANSWER: E

- 52.** The average annual job creation in Ethiopia is 112 jobs and standard deviation 40. If a random sample of 50 districts are selected, the probability that the sample mean is between 110 and 114 jobs is:
- A. 0.3500
 - B. 0.2736
 - C. 0.3632
 - D. 0.6368

ANSWER: B

- 53.** A researcher claimed that 90% of Haramaya University students access internet at the university in 2023. A researcher selected 50 students of the university and found that 80% of them accessed internet in the university in 2023. If the decision is accepted the H_0 , α is:
- A. 1%
 - B. 3%
 - C. 5%
 - D. 10%

ANSWER: A

54. The number of automobile accidents occurring per day in Dire Dawa is believed to have a Poisson distribution. A sample of 80 days during the past year gives the data shown below. If μ is 1 and $\alpha = 0.05$, $\chi^2_{cal.}$ value is

No. of accidents	0	1	2	3	4
Observed freq. (days)	3	25	11	7	3
	4				

- A. 8.38
- B. 0.7842
- C. 4.3036
- D. 7.001

ANSWER: C

55. Given the following data on the table below, Spearman's rank correlation is:

X	Y
10	200
9.8	44
8	32
7.8	24
7.7	22
1.7	17
6	15
5	12
1.4	8
2	4

- A. 0.526
- B. 0.251
- C. 0.762
- D. 0.903

ANSWER: D

56. All of the following are correct statements about management, EXCEPT

- A. Management is continuing activity
- B. Entails reaching important goals.
- C. Involves knowing how to perform the five major functions of management.

- C. Long range plans are plans that are not prepared separately; they are complementary of long-range plans.
- D. Intermediate range plans are a plan designed for a period which is between the long range and the short range

ANSWER: C

63. The operations research techniques mainly deal with

- A. Physical models
- B. Analogue models
- C. Analytical models
- D. Iconic models

ANSWER: C

64. Decision variables are those:

- A. Which pertain to unlimited resources
- B. Which pertain to limited resources
- C. Whose values provide the answers to the problem
- D. Which are redundant to the problem

ANSWER: C

65. The transportation models:

- A. Deals with transportation of a number of commodities from destinations
- B. Deals with minimization of transportation costs
- C. Cannot deal with problems involving maximization
- D. Cannot have multiple solution

ANSWER: B

66. In case a workers cannot be assigned a particular job:

- A. The relevant cost item is replaced by zero
- B. The relevant cost item is the same as the lower cost in the entire matrix
- C. The relevant cost item is replaced by M, a very large number
- D. The relevant cost item is subtracted from all the other cost items.

ANSWER: C

67. The objective function in a goal programming problem is to:

- A. Maximize the profits

- B. Minimize the costs
- C. Maximize the effectiveness
- D. Minimize the deviations from the goal

ANSWER: D

68. PERT uses three-time estimates because:

- A. Three-time estimates are more accurate than one-time estimates
- B. The activity duration is known with certainty
- C. The project has been done so many times that there is variability in the duration of activities
- D. The duration of activities is probabilistic

ANSWER: D

69. While using mixed strategies:

- A. The players must inform each other of the strategy that they are going to use.
- B. They must use the available strategies equally.
- C. They must use the available strategies according to proportions given by the solution and should ensure security and secrecy of their strategy
- D. They must use only one strategy each

ANSWER: B

70. It is a good source of filling the vacancies with employees from over staffed departments.

- A. Transfer
- B. Promotion
- C. Placement agencies
- D. Government exchanges

ANSWER: A

71. Which of the following is not an advantage of using external sources of recruitment?

- A. Qualified personnel
- B. Wider choice
- C. Fresh talent

D. Economical source

ANSWER: D
