

Injibara University
College of Business and Economics
Department of Marketing Management
Model Exit Examination (2017Ec.)

1. In the context of marketing myopia, what is the potential consequence of focusing excessively on products rather than customer needs?
 - A. Increased brand awareness
 - B. Enhanced product quality
 - C. Loss of relevance in the market**
 - D. Expansion into new markets.
2. For a pharmaceutical firm, political and legal regulations primarily influence operations through:
 - A. Shaping consumer preferences
 - B. Guiding pricing strategies
 - C. Defining marketing channels
 - D. Regulating product approval processes**
3. A New Smartphone company launches and identifies that customers need better battery life and a high-quality camera. What are these identified elements considered?
 - A. Wants**
 - B. Demands
 - C. Market offerings
 - D. Transactions
4. The shop introduces a loyalty program to encourage repeat customers. This strategy is aimed at enhancing:
 - A. Exchange
 - B. Value perception**
 - C. Market offering
 - D. Demand
5. An E-commerce platform utilizes data analytics to understand buying patterns. This practice is crucial for:
 - A. Enhancing customer service
 - B. Reducing operational costs
 - C. Understanding market trends**
 - D. Increasing advertising spend
6. A company focusing on a niche market is likely to:
 - A. Compete on price alone
 - B. Develop specialized products for a specific group**

- C. Target the mass market
 - D. Minimize marketing efforts
7. Effective positioning communicates:
- A. The unique value proposition to the target market
 - B. The technical specifications of a product
 - C. The company's financial performance
 - D. The history of the brand
8. Packaging plays a crucial role in product management by:
- A. Increasing production costs
 - B. Standardizing product offerings
 - C. Decreasing brand awareness
 - D. Enhancing product visibility and protection
9. Dynamic pricing allows businesses to:
- A. Set fixed prices for all customers
 - B. Adjust prices based on real-time supply and demand
 - C. Eliminate discounts
 - D. Standardize pricing across regions
10. Direct marketing allows companies to:
- A. Reach a broad audience through mass media
 - B. Avoid customer feedback
 - C. Target specific consumers with individualized messages
 - D. Standardize marketing messages
11. The effectiveness of a distribution channel can be evaluated based on:
- A. Customer satisfaction, delivery speed, and cost efficiency
 - B. Brand awareness only
 - C. Employee performance
 - D. Production volume
12. Studying consumer behavior allows marketers to anticipate:
- A. Customer complaints only
 - B. Supply chain issues
 - C. Shifts in consumer preferences and buying habits
 - D. Inflation rates
13. Which of the following is most likely to influence the evaluation of alternatives stage?
- A. Store layout
 - B. Brand reputation
 - C. After-sales service
 - D. User reviews
14. What type of motivation is driven by external rewards such as money or recognition?
- A. Intrinsic motivation
 - B. Rational motivation

C. Emotional motivation

D. Extrinsic motivation

15. A consumer who is organized, disciplined, and prefers structure is likely high in which personality trait?

A. Conscientiousness

B. Neuroticism

C. Openness

D. Extraversion

16. The term perceptual map refers to:

A. A GPS system built into a product

B. A visual representation of how consumers view brands in relation to others

C. A list of all available marketing channels

D. A consumer's purchase history

17. Which of the following is an example of behavioral learning?

A. A customer chooses a brand after repeated positive use

B. A consumer buys a new phone after watching online reviews

C. A child asks for candy after seeing a TV ad

D. A shopper compares specs of three laptops before buying

18. If a consumer has a negative attitude toward a brand, what should marketers try to do?

A. Lower the price significantly

B. Discontinue the product

C. Use persuasive communication to change the consumer's beliefs and feelings

D. Ignore the feedback

19. Which of the following traits is most likely found in consumers who adopt innovations early?

A. Risk aversion

B. Traditional mindset

C. High need for social approval

D. High openness to experience

20. What is cultural sensitivity in marketing?

A. Adapting marketing messages to respect and reflect cultural values

B. Using humor in all ads

C. Ignoring cultural differences

D. Selling only local products

21. Which of the following is a primary source of data in marketing research?

A. Industry reports

B. Customer surveys

C. Published articles

D. Government statistics

22. In a research study, exploratory research is typically used to:

A. Test a hypothesis or theory

B. Identify the root cause of a problem

C. Collect detailed, quantitative data

D. Understand a poorly defined problem or uncover new insights

23. The first step in developing a research design is to:
- A. Define the research problem
 - B. Choose the data collection method
 - C. Analyze the data
 - D. Prepare the final report
24. Content analysis in qualitative research involves:
- A. Statistical analysis of numerical data
 - B. Systematically categorizing and interpreting text or visual data
 - C. Conducting experiments with control and experimental groups
 - D. Using random sampling to select participants
25. Which of the following is NOT a characteristic of quantitative research?
- A. Use of large sample sizes
 - B. Focus on statistical analysis
 - C. Data collection using open-ended questions
 - D. Use of structured instruments like surveys or questionnaires
26. Which of the following is an example of a continuous variable in quantitative research?
- A. Gender
 - B. Age
 - C. Nationality
 - D. Marital status
27. In the context of determining sample size, what does the confidence level refer to?
- A. The number of samples needed to make a decision
 - B. The number of times a researcher can repeat the study
 - C. The variation between samples from the same population
 - D. The likelihood that the sample accurately represents the population
28. Which statistical measure is commonly used to identify outliers in a dataset?
- A. Mean
 - B. Mode
 - C. Standard deviation
 - D. Median
29. The net promoter score (NPS) is commonly used to:
- A. Measure customer satisfaction and loyalty
 - B. Identify the optimal price for a product
 - C. Evaluate the effectiveness of a marketing campaign
 - D. Analyze the distribution channels for a product
30. ----- is a measure of the percentage of people in the target market who are exposed to the advertising campaign during a given period.
- A. Media impact
 - B. Frequency
 - C. Reach
 - D. All.

31. What one is ordinarily the dominant promotional mix component for unique, highly technical, or custom-made products?
- A. Trade shows
 - B. Personal selling
 - C. Publicity
 - D. Advertising
32. Providing a retail store's location and operating hours to the public in an advertisement is an example of advertising designed to meet the advertising goal of:
- A. Building brand image
 - B. Persuasion
 - C. Encouraging action
 - D. Informing
33. From the given alternatives which one **is not** key Features of IMC?
- A. Affect behaviour.
 - B. Build relationships
 - C. Speak with multiple voices
 - D. Start with the customer
34. All are the main Reasons for the Growing Importance of IMC **Except one;**
- A. Avoid duplication and take advantage of the synergy
 - B. Use of the Internet and electronic commerce is growing
 - C. New technologies have given consumers greater control over the communication process
 - D. Consumers' being highly responsive to traditional advertising
35. A type of promotional budget approach in that management determines the budget solely based on what is felt to be necessary.
- A. Arbitrary Allocation
 - B. The Affordable Method
 - C. Percentage of Sales Method
 - D. Competitive Parity method

36. A type of communication model the consumer passes through a series of steps in sequential order from initial awareness of a product to actual purchase is -----
- A. Traditional Response Model
 - B. Hierarchy of effects model**
 - C. Innovation adoption model
 - D. Information processing model
37. From the given alternatives which one correctly combined consumer domains in analysing communication responses?
- A. Conative → Conviction & purchase**
 - B. Affective → Awareness & Knowledge
 - C. Cognitive → Linkage and preference
 - D. All
38. A source of brand equity association that gives consumers a compelling reason why they should prefer this brand over the others is -----
- A. Brand Resonance
 - B. Brand Imagery
 - C. Brand Feelings
 - D. Brand salience**
39. _____ are short phrases that communicate persuasive information about the brand
- A. Jingle
 - B. Visual
 - C. Slogans**
 - D. Logo
40. From the given alternatives, which one is a means to provide in-depth information and insights essential for setting long-term strategic direction for the brand?
- A. Brand edit
 - B. Brand audit**
 - C. Brand recalling
 - D. Brand rejuvenating
41. A brand hierarchy level applied across a range of products and efficient means to link common associations to multiple but distinct products.

A. Family Brand

B. Brand personality

C. Corporate Brand

D. Individual Brand

42. Whatever the model, version, place or anything else changed companies shouldn't change their commitment. This statement implies that:

A. Brand clarity

B. Brand Consistency

C. Brand Credibility

D. All of the above

43. The design and implementation of marketing programs and activities to build, measure, and manage brand equity is referred to as -----.

A. Strategic Brand Management

B. Co-branding

C. Celebrity Endorsement

D. Brand value chain

44. Among the given alternatives one is **not** the typical example of brand challenges.

A. Media Fragmentation

B. Brand proliferation

C. Savvy Consumers

D. Decreased Competition

45. Both brand association and brand personality are a part of _____.

A. Brand symbol

B. Brand image

C. Brand relationship

D. None of the above

46. It is the Signals of refinements or differences in the brand related to factors such as quality levels, attributes, and functions.

A. Brand emotions

B. Brand elements

C. Modifiers

D. Brand judgment

47. An online tutoring company uses well-trained educators, detailed learning plans, and instant feedback tools. These aspects best reflect attention to which service strategy component?

A. Product

B. People

C. Place

D. Promotion

48. The moment of truth in service marketing refers to:

A. Customer contact with the service provider

B. Launch of a new service

C. A marketing campaign

D. Employee performance evaluation

49. A mobile banking app receives complaints despite fast load times and advanced features.

Reviews frequently mention confusion with navigation. This pattern suggests a gap in:

A. Technical performance

B. Price fairness

C. Service design expectations

D. Promotional messaging

50. A family dining chain consistently delivers meals quickly, but customers still rate the experience poorly. Comments reveal dissatisfaction with staff attitude and cleanliness. The issue most likely stems from a mismatch between:

A. Service delivery and customer expectations

B. Menu variety and target market

C. Service quality and physical layout

D. Price and portion size

51. A tech support center meets its promised 24-hour response time, yet customer satisfaction remains low. Analysis of feedback shows customers desire instant answers. This gap is best categorized as:

A. Service standards over performance

B. Poor employee training

C. Product reliability failure

D. Zone of tolerance misalignment

52. A luxury resort advertises “unforgettable experiences” but provides generic tours and standardized service. This situation reflects:
- A. Customer participation failure
 - B. Low customer readiness
 - C. **Gap between promised experience and service performance**
 - D. Demand management error
53. SERVQUAL is a model used to measure:
- A. **Customer satisfaction**
 - B. Profitability
 - C. Service productivity
 - D. Market share
54. A coffee shop barista realizes a drink order was wrong and immediately remakes the drink while offering a coupon for the next visit. This demonstrates the ability to:
- A. Enforce refund policies
 - B. Promote loyalty programs
 - C. Increase operational speed
 - D. **Perform tangible compensation in recovery**
55. One of the best strategies to reduce variability in service delivery is:
- A. Increasing prices
 - B. **Using standardized procedures and staff training**
 - C. Expanding to more locations
 - D. Outsourcing the service
56. How does e-commerce improve customer experience compared to traditional commerce?
- A. By enabling face-to-face transactions
 - B. By limiting communication channels
 - C. By relying on manual processes
 - D. **By offering 24/7 shopping convenience**
57. If a company wants to participate in a virtual auction, which e-commerce type does this represent?
- A. **Consumer-to-Consumer (C2C)**
 - B. Business-to-Business (B2B)
 - C. Business-to-Government (B2G)

D. Consumer-to-Business (C2B)

58. If an e-commerce company conducts a risk analysis to evaluate a new product launch, which phase of strategic planning is this?
- A. Strategy initiation
 - B. Strategy formulation
 - C. Strategy implementation
 - D. Strategy assessment
59. To enhance its online brand presence, a company decides to create a unique website experience. What should it focus on?
- A. Consistent branding and user-friendly design
 - B. High advertising costs
 - C. Reducing website features
 - D. Limiting customer interaction
60. What is a critical factor to consider when implementing M-Commerce strategies?
- A. Reducing mobile app features
 - B. Limiting payment options
 - C. Ignoring user feedback
 - D. Ensuring robust security measures
61. When comparing traditional payment systems to E-commerce payment systems, what is a key difference?
- A. Traditional systems are faster
 - B. E-commerce systems require physical presence
 - C. E-commerce systems offer global reach
 - D. Traditional systems are more secure
62. Determine the main benefit of electronic fund transfers for businesses.
- A. Increased paperwork
 - B. Faster transactions
 - C. Higher transaction fees
 - D. Limited payment options
63. Select the feature that ensures the integrity of data during transmission.
- A. Data encryption
 - B. Regular backups
 - C. Real-time processing
 - D. User authentication
64. In the context of logistics management, which strategy specifically aims to minimize environmental impact while optimizing processes?
- A. Lean Logistics
 - B. Green Logistics
 - C. Reverse Logistics
 - D. Integrated Logistics

65. After receiving feedback indicating dissatisfaction with delivery times, what actionable steps should a company take to enhance its logistics program and improve customer perception?
- A. Analyze delivery processes to identify and improve bottlenecks
 - B. Ignore the feedback and continue with existing delivery practices
 - C. Increase product prices to compensate for perceived service shortcomings
 - D. Shift focus to marketing strategies without addressing logistics issues
66. A logistics manager needs to optimize transportation routes to reduce costs. Which approach is most effective?
- A. Use fixed routes without considering current traffic conditions
 - B. Rely on manual calculations for route planning
 - C. Implement routing software to analyze variables and suggest optimal paths
 - D. Select routes based solely on past experiences.
67. A logistics company is struggling with delayed shipments due to traffic congestion. What should they prioritize to improve delivery times?
- A. Ignore traffic conditions and stick to predetermined routes
 - B. Increase delivery times without addressing traffic issues
 - C. Reduce the number of vehicles in operation
 - D. Implement dynamic routing to adjust paths based on real-time traffic data
68. In designing a marketing channel, what should a company primarily consider regarding its target market?
- A. The company's historical sales data
 - B. The characteristics and preferences of the intended audience
 - C. The geographic location of competitors only
 - D. The cost of production exclusively
69. A coffee brand observes competitors' distribution channels for gaps. What is the primary goal of this analysis?
- A. To identify opportunities for differentiation and innovative distribution methods
 - B. To replicate competitors' strategies exactly
 - C. To increase prices based on competitors' pricing
 - D. To eliminate all competition from the market
70. A logistics manager needs to improve communication with channel partners. What approach should they prioritize?
- A. Limit interactions to quarterly meetings
 - B. Focus solely on internal communication within the logistics team
 - C. Maintain traditional communication methods without technology
 - D. Implement real-time information sharing systems to enhance collaboration
71. Which of the following is NOT a recognized cause of channel conflict?
- A. Role incongruities among channel members
 - B. Communication difficulties leading to misunderstandings
 - C. Resource scarcities affecting distribution
 - D. Inconsistent product quality from manufacturers

72. The integration of logistics and channel management is essential for:
- A. Maintaining high production costs
 - B. Ensuring a smooth flow of products from producers to consumers
 - C. Reducing advertising expenses
 - D. Isolating marketing strategies
73. A first-line sales manager is struggling to meet sales goals. What should they prioritize first?
- A. Cutting costs
 - B. Revising job descriptions
 - C. Day-to-day supervision and motivation
 - D. Delegating legal compliance
74. A firm focusing on customer trust, joint problem-solving, and long-term benefits is practicing:
- A. Transactional selling
 - B. Telemarketing
 - C. Push marketing
 - D. Partnership selling
75. Why might a company use the Delphi method in forecasting?
- A. To base decisions on past data
 - B. To simulate economic cycles
 - C. To reach expert consensus in the absence of historical data
 - D. To eliminate judgment from the process
76. A sales analyst calculates a correlation coefficient of $r = 0.95$ between the number of advertisements and sales volume. What is the best conclusion based on this result?
- A. There is a strong negative linear relationship, indicating that more advertisements decrease sales volume
 - B. There is a strong positive linear relationship, suggesting that an increase in advertisements is associated with higher sales volume
 - C. The correlation coefficient indicates a weak and statistically insignificant relationship between advertisements and sales
 - D. The variables show no linear relationship, implying that the number of advertisements does not affect sales volume
77. What does a job description typically include?
- A. Personal values
 - B. Salary history
 - C. Duties, responsibilities, reporting lines
 - D. Health information
78. Which recruitment strategy improves morale and reduces turnover most effectively?
- A. Internal recruiting
 - B. Mass hiring
 - C. Online advertising
 - D. Public job fairs

79. Which type of sales organization gives full line authority from top sales managers to subordinates?
- A. Functional
 - B. Line and Staff
 - C. Market-based
 - D. **Line**
80. A sales team is demotivated due to unclear rewards. What should the manager do?
- A. Increase sales quotas
 - B. Fire the weakest performer
 - C. **Establish a clear compensation and incentive structure**
 - D. Hire a consultant
81. As a new training manager, you notice your sales team struggles with handling customer objections. To simulate real sales situations and build their confidence through practice, which training method should you use?
- A. **Role play**
 - B. Observation
 - C. On-the-job training
82. Ruth, a new sales rep, prefers stable and predictable monthly income over high-risk, performance-based pay. Which compensation structure best suits her needs?
- A. Straight commission
 - B. **Straight salary**
 - C. Bonus-only
 - D. Travel allowance
83. Which of the following would be considered a qualitative evaluation criterion?
- A. Sales volume
 - B. Average deal size
 - C. **Peer feedback on cooperation and professionalism**
 - D. Number of leads converted
84. In strategic marketing, what does “value proposition” refer to?
- A. The cost savings from a supplier
 - B. The emotional appeal of advertising
 - C. **The unique value a company promises to deliver to its customers**
 - D. The legal terms in a sales contract
85. In the Ansoff Matrix, introducing an existing product into a new geographical market is an example of:
- A. Market Penetration
 - B. Product Development
 - C. Diversification
 - D. **Market Development**

86. In the BCG Matrix, products that generate more cash than they require to maintain their market position are called:
- A. Cash Cows
 - B. Dogs
 - C. Stars
 - D. Question Marks
87. Why might a bypass strategy be particularly effective in high-tech industries?
- A. Price wars are more effective in technology markets
 - B. High-tech markets favor small-scale tactical approaches
 - C. Technological leapfrogging can render existing products obsolete
 - D. It avoids the need for market research and R&D investment
88. One of the following is not a market follower strategy?
- A. Guerrilla Warfare
 - B. By pass attack
 - C. Contraction Defense
 - D. All of the above
89. A type of audit that measures the ROI of marketing activities refers to:
- A. Marketing environment audit
 - B. Marketing productivity audit
 - C. Marketing strategy audit
 - D. Marketing system audit
90. One of the key characteristics of a marketing audit is that it should be:
- A. Conducted only once every five years
 - B. Limited to reviewing the company's digital marketing strategies
 - C. Regular and continuous for ongoing improvement
 - D. Focused solely on the company's sales data
91. A business that is low in opportunities but high in threats refers to:
- A. An ideal business
 - B. A speculative business
 - C. A mature business
 - D. A troubled business
92. When managing the product element of the marketing mix, which of the following should a company consider?
- A. Product pricing and discount strategies
 - B. Product design, features, and packaging
 - C. Advertising campaigns to promote the product
 - D. Distribution channels for the product
93. Which of the following is a pricing strategy that is based on setting a price high initially and then lowering it over time?

- A. Penetration pricing
- B. Psychological pricing
- C. Skimming pricing
- D. Cost-plus pricing

94. In the marketing mix, integrating online and offline channels to reach customers is part of which strategy?

- A. Integrated marketing communications (IMC)
- B. Product diversification
- C. Place strategy
- D. Price skimming

95. In B2B markets, the buying process is usually:

- A. Fast and based on impulse
- B. Simple and emotional
- C. Complex and involves multiple decision-makers
- D. Unstructured and random

96. Which of the following is an example of a derived demand in business marketing?

- A. A customer buying a new smartphone for personal use
- B. A manufacturer buying steel because of increased demand for cars
- C. A student purchasing a laptop
- D. A family buying groceries

97. Which metric is most commonly used in B2B marketing to measure success?

- A. Likes and shares on social media
- B. Number of email subscribers
- C. Number of unique website visitors
- D. Customer lifetime value (CLV) and return on investment (ROI)

98. In industrial markets, reciprocal buying refers to:

- A. Buying from the lowest-cost supplier
- B. Buying only from international vendors
- C. A mutual agreement where two businesses buy from each other
- D. Buying based on brand loyalty

99. What is systems selling in the context of business buying?

- A. Selling a single product without any additional services
- B. A sales approach that involves selling complete solutions, including multiple products and services
- C. Selling products directly to the end consumer
- D. Selling products through intermediaries only

100. Which segmentation strategy would be most appropriate if a business offers a range of products that address the needs of multiple industries, such as healthcare, education, and manufacturing?

- A. Niche marketing
- B. Undifferentiated marketing

- C. Concentrated marketing
 - D. Differentiated marketing
101. Which of the following is an example of a capital good in industrial markets?
- A. Office supplies
 - B. Raw materials
 - C. Machinery and equipment used in manufacturing
 - D. Finished goods
102. Which of the following is an example of price discrimination in industrial pricing?
- A. Charging higher prices for products in high-demand regions
 - B. Offering discounts based on volume purchased
 - C. Setting the same price for all customers regardless of quantity
 - D. Changing prices based on customer feedback
103. Dual distribution refers to:
- A. Selling through two different types of intermediaries (e.g., wholesalers and retailers)
 - B. Offering the same product through both direct and indirect channels
 - C. Selling the same product at two different prices in the market
 - D. Offering two complementary products in one package
104. Which of the following is NOT listed as a special characteristic of agricultural products affecting their marketing?
- A. Perishability
 - B. Seasonality of Production
 - C. Homogeneity in Quality
 - D. Bulkiness of Products
105. Buying and selling are classified under which set of marketing functions?
- A. Physical Functions
 - B. Exchange Functions
 - C. Facilitating Functions
 - D. Logistical Functions
106. In grain marketing, which participant is crucial for storage?
- A. Retailers
 - B. Farmers
 - C. Wholesalers
 - D. Grain elevators
107. What is a put option in agricultural trading?
- A. A right to buy a commodity at a fixed price
 - B. A mandatory purchase agreement
 - C. A right to sell a commodity at a fixed price
 - D. A flexible pricing strategy
108. Policymakers can support the development of commodity exchanges by:
- A. Increasing transaction fees
 - B. Promoting market transparency
 - C. Restricting market access

- D. Limiting information dissemination
- 109. Identify the importance of a grading system for commodity exchanges.
 - A. Complicates consumer understanding
 - B. Limits the number of traders involved
 - C. Ensures consistent quality and facilitates trade
 - D. Reduces production costs for farmers
- 110. How do grading systems affect market efficiency?
 - A. They complicate sales processes
 - B. They increase storage costs
 - C. They limit competition
 - D. They standardize product quality
- 111. What might happen if an agricultural product lacks differentiation?
 - A. Increased consumer loyalty
 - B. Competing solely on price
 - C. Higher production quality
 - D. Enhanced brand recognition
- 112. In which of the following international marketing orientations does a company believe that its marketing practices, values, and product offerings are superior to those in other countries?

- A. Polycentric
 - B. **Ethnocentric**
 - C. Geocentric
 - D. Regiocentric
113. In 2024, a European oil company operating in Venezuela had its assets taken over by the Venezuelan government. The government promised compensation, but payment has been delayed indefinitely, citing economic hardship. What type of political risk is the company primarily facing in this scenario?
- A. Confiscation
 - B. Nationalization
 - C. **Expropriation**
 - D. Sanction
114. As part of a group project, you are tasked with creating a brand identity for a European organic chocolate entering the Indian market. You have access to Canva and research data on Indian consumer preferences. What is the best way to approach this task?
- A. Use the European branding without any adjustments
 - B. Submit a report without including any visual materials
 - C. Focus on pricing only and skip the branding process
 - D. **Design a campaign that reflects Indian culture and values**
115. An Ethiopian coffee company wants to sell in Germany but avoid setting up physical facilities. Which is the most practical entry mode?
- A. **Direct exporting**
 - B. Franchising
 - C. Greenfield investment
 - D. Merger
116. Which of the following best illustrates an example of indirect exporting?
- A. A company opens its own distribution office in a foreign country
 - B. A firm appoints a local agent to sell its products in another country
 - C. **A company sells goods to an export house that handles international sales**
 - D. A business partners with a local firm to form a joint venture abroad
117. Tesla promotes its electric cars as innovative, high-performance, environmentally friendly, luxurious, and cutting-edge. This shapes how customers perceive the brand. What aspect of brand meaning is being emphasized here?
- A. Brand personality
 - B. Target user image
 - C. Product attributes
 - D. **Product benefits**
118. A company exports electronics to a foreign market at prices significantly lower than those at home, causing local producers there to complain of unfair competition. What is this practice called?
- A. Countertrade
 - B. Price skimming
 - C. **Dumping**

- D. Transfer pricing
119. In international advertising, an informative advertising objective is most important when:
- A. Introducing a new product category in a foreign market to create primary demand
Promoting mature products in well-established foreign markets
 - B. Competing in markets where the goal is to build demand for a specific brand
 - C. Reinforcing existing customer loyalty in foreign markets
120. When a company sells through a foreign merchant, what is the main advantage?
- A. Increased production flexibility
 - B. Immediate access to local customers and markets
 - C. Reduced shipping costs
 - D. Full control over pricing
