Department of software engineering

1 Who writes the Software Requirement Specifications Document(SRS)?

- A System Developer
- B System Tester
- C System Analyst
- D None of these above

[View Answer](#) [Comment](#)

Answer: Option [C]

2 What is the goal of the requirements analysis and specifications phase of software development life cycle ?

- A Understanding the customer requirements and organize them in an informal document
- B Analyzing the cost of development
- C Determining scope of the software
- D None of these above

[View Answer](#) [Comment](#)

Answer: Option [A]

3 What is the final outcome of the requirements analysis and specifications phase ?

- A Drawing the data flow diagram
- B The SRS Document
- C Coding the project
- D The User Manual

[View Answer](#) [Comment](#)

Answer: Option [B]

4 Which of the following is not a desirable characteristic of SRS document ?

- ☐ A Concise
- ☐ B Ambiguous
- ☐ C Traceable
- ☐ D Verifiable

[View Answer](#) [Comment](#)

Answer: Option [B]

SRS document should be unambiguous

5 What is noise in terms of software development ?

- ☐ A Writing irrelevant statement to the software development in the SRS document
- ☐ B Adding contradictory requirements in SRS document
- ☐ C Writing over-specific requirements
- ☐ D None of these above

[View Answer](#) [Comment](#)

Answer: Option [A]

Questions

[Download PDF](#)

6 Which of the following is not included in the Software Requirements Specification(SRS) Document ?

- ☐ A Functional Requirements
- ☐ B Non-functional requirement
- ☐ C Goals of implementation
- ☐ D User manual

[View Answer](#) [Comment](#)

Answer: Option [D]

7 SRS document is called black box specification of a system because

- ☐ A It does not contain the contradictory materials
- ☐ B It does not contain the user documentation
- ☐ C SRS document should specify only the external behaviour of the system
- ☐ D None of these above

[View Answer](#) [Comment](#)

Answer: Option [C]

8 Which of the following expects cost estimation from SRS document ?

- ☐ A Project Manager
- ☐ B User documentation writer
- ☐ C Software developers
- ☐ D Maintenance engineers

[View Answer](#) [Comment](#)

Answer: Option [A]

9 The goal of reading SRS document by the software developer is to :

- ☐ A ensure requirements are understandable from a functionality point of view
- ☐ B understand the features of the product
- ☐ C ensure that the software is developed as per customer needs
- ☐ D none of these

[View Answer](#) [Comment](#)

Answer: Option [C]

10 Which of the following quality of SRS document ensures to compare the results of a phase with another phase ?

- ☐ A Structured
- ☐ B Verifiable

☒ Traceable

☐ Concise

[View Answer](#) [Comment](#)

Answer: Option [C]

1. If every requirement can be checked by a cost-effective process, then the SRS is _____?

- A). Verifiable
- B). Complete
- C). Traceable
- D). Modifiable

[View Answer](#)

Correct: A

2. If every requirement stated in the Software Requirement Specification(SRS) has only one interpretation, SRS is said to be _____?

- A). Correct
- B). Unambiguous
- C). Verifiable
- D). Consistent

[View Answer](#)

Correct: B

3. The major goal of requirement determination phase of information system development is _____?

- A). Determine whether information is needed by an organization
- B). Determine what information is needed by an organization
- C). Determine when information is to be given
- D). Determine how information needed by an organization can be provided

[View Answer](#)

Correct: B

4. Consider a system where a heat sensor detects an intrusion and alerts the security company. What kind of a requirement the system is providing?

- A). Functional
- B). Non-Functional
- C). Known Requirement

Department of software engineering

D). None of the mentioned

[View Answer](#)

Correct: A

5. Everyone on the software team should be involved in the planning activity so that we can _____?

- A). Analyze requirements in depth
- B). Reduce the granularity of the plan
- C). Get all team members to "sign up" to the plan
- D). Begin design

[View Answer](#)

Correct: C

6. Analysis models depict software in which three representations?

- A). Architecture, interface, component
- B). Information, function, behavior
- C). Cost, risk, schedule
- D). None of the above

[View Answer](#)

Correct: B

7. Which one of the following is not a step of requirement engineering?

- A). Requirement analysis
- B). Requirement elicitation
- C). Requirement design
- D). Requirement documentatlon

[View Answer](#)

Correct: C

8. Which one of the following is a functional requirement?

- A). Maintainability
- B). Portability
- C). Robustness
- D). None of the above

[View Answer](#)

Correct: D

9. Requirement Development, organizational process focus, organizational training, risk management and integrated supplier management are process areas required to achieve maturity level _____?

- A). Defined
- B). Optimized
- C). Managed

D). Performed

[View Answer](#)

Correct: A

10. Which of the following is not the primary objectives in the preliminary investigation of system development?

A). Assess cost and benefit of alternative appropes

B). Determining the size of the project

C). Preparing the SRS to cover all the system specifications

D). Report finding to the management with recomendation to accept or reject the proposal

[View Answer](#)

Correct: C

11. Whose responsibility it is to conduct interviews with the users and understand their requirements?

A). Steering committee

B). Business Analyst

C). Domain Specialist

D). Project Managers

[View Answer](#)

Correct: B

12. Information requirements of an organization can be determined by ____?

A). Finding out what similar organizations do

B). Interviewing managers and users and arriving at the requirements based on consensus

C). Sending a questionnaire to all employees of the organization

D). Telling organization what they need based on your experience

[View Answer](#)

Correct: B

13. ____ and ____ are not the subject matter of requirement analysis.

A). Performance, modelling present system

B). Functional, non-functional

C). Internal controls, present system work load

D). Stakeholder knowledge of computers, developer's staff

[View Answer](#)

Correct: D

14. In which testing strategy requirements established during requirements analysis are validated against developed software?

- A). Validation testing
- B). Regression testing
- C). Integration testing
- D). System testing

[View Answer](#)

Correct: A

15. Initial requirements specification is _____?

- A). Only a rough indication of the requirement
- B). Not changed till the end of the project
- C). Continuously changed during project implementation
- D). Changed and finalized after feasibility study

[View Answer](#)

Correct: A

16. It is necessary to consult the following while drawing up requirement specification.

- A). Only top managers
- B). Only top and middle management
- C). Only top, middle and operational managers
- D). Top, middle and operational managers and also all who will use the system

[View Answer](#)

Correct: D

17. It is necessary to prioritize information requirements of an organization at the requirements determination phase as _____?

- A). It is always good to prioritize
- B). There are conflicting demands from users
- C). There are constraints on budgets, available time, human resource and requirement
- D). All good organization do it

[View Answer](#)

Correct: C

18. Which of the following statements about SRS is/are true?

- i). SRS is written by customer
 - ii). SRS is written by a developer
 - iii). SRS serves as a contract between customer and developer
- A). Only i is true
 - B). Both ii and iii are true
 - C). All are true
 - D). None of the above

[View Answer](#)

Correct: C

19. When is the requirement specification activity carried out _____?

- A). Simultaneously with requirements determination
- B). Before requirements are determined
- C). After requirements are determined
- D). Independent of requirements determination

View Answer

Correct: C

20. Which of the following is not included in SRS?

- A). Performance
- B). Functionality
- C). Design solutions
- D). External Interfaces

View Answer

Correct: C

21. The main goal of arriving at a final specification is _____?

- A). To compute the cost of implementing the system
- B). To assist in designing the system
- C). To tell the organization's managers how the system will function
- D). To tell the organization's managers what the proposed system will achieve in a language understood by them

View Answer

Correct: D

22. Final specifications are drawn up by _____?

- A). System designers along with users
- B). The managers of user organization
- C). System analyst in consultation with programmers
- D). System analyst in consultation with the management of the organization

View Answer

Correct: D

23. The role of a system analyst drawing up a requirements specification is similar to _____?

- A). Architect designing a building
- B). A structural engineer designing a building
- C). A contractor constructing a building
- D). The workers who construct a building

View Answer

Correct: A

24. Which one from the following is highly associated activity of project planning?

- A). Keep track of the project
- B). Compare actual and planned progress and costs
- C). Identify the activities, milestones and deliverables produced by a project
- D). Both B and C

View Answer

Correct: C

25. The final specifications are arrived at _____?

- A). During feasibility study
- B). After feasibility study
- C). Just before implementation phase
- D). When the system is being designed

View Answer

Correct: B

26. Arrange the given sequence to form a SRS prototype outline as per SRS standard.

- i). General description
- ii). Introduction
- iii). Review
- iv). Appendices
- v). Specific Requirements

- A). iii, i, ii,v, iv
- B). iii, ii, i, v, iv
- C). ii, i, v, iv, iii
- D). iii, i, ii,v,iv

View Answer

Correct: C

27. Requirements prioritization and negotiation belongs to _____?

- A). Feasibility study
- B). Requirements elicitation
- C). Requirements validation
- D). Requirements reviews

View Answer

Correct: B

28. System approval criteria are specified _____?

- A). During feasibility study
- B). During the requirements specifications stage
- C). During system study stage

Department of software engineering

D). When the final specifications are drawn up

View Answer

Correct: D

29. Which of the following is used to determine the specificity of requirements. Where n_1 is the number of requirements for which all reviewers have identical interpretations, n_2 is number of requirements in a specification.

A). n_1/n_2

B). n_2/n_1

C). n_1+n_2

D). n_1-n_2

View Answer

Correct: A

30. Requirements analysis is critical to the success of a development project.

A). True

B). False

C). Depends upon the size of project

D). None of the mentioned

View Answer

Correct: A
