

Points:

58/100

Time:

02:03:13

Correct

1/1 Points

1

When testing a grade calculation system, a tester determines that all scores from 90 to 100 will yield a grade of A+, but scores below 90 will not. This analysis is known as:

- ☐ State transition
- ☐ Boundary value analysis
- ☐ Equivalence partitioning
- ☐ Use case testing

Correct

1/1 Points

2

Given the following code, which statement is true about the minimum number of test cases required for full statement and branch coverage?

Read p

Read q

IF $p+q > 100$

THEN Print "Large"

ENDIF

IF $p > 50$

THEN Print "p Large"

ENDIF

- ☐ 1 test for statement coverage, 2 for branch coverage
- ☐ 2 tests for statement coverage, 2 for branch coverage
- ☐ 1 test for statement coverage, 1 for branch coverage
- ☐ 2 tests for statement coverage, 1 for branch coverage

Correct

1/1 Points

3

Why Complete testing is near impossible in software testing:

- ☐ The domain of possible inputs of a program is too large to be completely used in testing a system
- ☐ It may not be possible to create all possible execution environments of the system
- ☐ the design issues may be too complex to completely test
- ☐ All of the above

Correct

1/1 Points

4

While evaluating the quality of a product, one must ask the key question, "Does the product satisfy customer needs and expectations? which software quality view most describe this idea

- ☐ Manufacturing View
- ☐ User View
- ☐ Value-Based View
- ☐ Transcendental View

Incorrect

0/1 Points

5

Among the following which one is **not the inputs on which test process is based:**

- ☐ Test analysis and design
- ☐ Test strategy
- ☐ Project plan
- ☐ Information about how the testing is progressing

Correct

1/1 Points

6

Which one of the following is **not true** about static software testing?

- ☐ Static testing can be done manually
- ☐ Code is executed during static testing
- ☐ Automation testing impossible in static testing
- ☐ B&C

Incorrect

0/1 Points

7

A Type of functional Testing, which investigates the functions relating to detection of threats, such as virus from malicious outsiders.

- ☐ Reliability testing
- ☐ usability testing
- ☐ sanity testing
- ☐ Security Testing

Incorrect

0/1 Points

8

Who is responsible for document all the issues, problems and open point that were identified during the review meeting

- ☐ Scriber
- ☐ Author
- ☐ Manager
- ☐ Moderator

Correct

1/1 Points

9

A wholesaler sells printer cartridges. The minimum order quantity is 5. There is a 20% discount for orders of 100 or more printer cartridges. You have been asked to prepare test cases using various values for the number of printer cartridges ordered. Which of the following groups contain three test inputs that would be generated using Boundary Value Analysis?

- ☐ 5,6,7

- ☐ 97,98,99
- ☐ 4, 5, 99
- ☐ 3,4,5

Correct

1/1 Points

10

Repeated testing of an already tested program, after modification, to discover any defects introduced or uncovered as a result of the changes in the software being tested or in another related or unrelated software component

- ☐ Regression Testing
- ☐ Smoke testing
- ☐ Performance testing
- ☐ Security testing

Correct

1/1 Points

11

Which one of the following static testing techniques would **not done** with profession outside the testing team members.

- ☐ Expert Expert opinion
- ☐ Inspection
- ☐ Audit
- ☐ All of the above

Correct

1/1 Points

12

Among the following statement one **correct** about software error, fault and failure

- ☐ Every software error leads to software faults and every fault leads to software failure
- ☐ Every fault end with software failure, but every error may not end with software faults
- ☐ Every fault may not end with software failure but every error end with software faults
- ☐ Every error may not end with software faults and every fault may not end with software failure

Correct

1/1 Points

13

Among the following, one is **not the inputs** for test implementation/execution process?

- ☐ Level test plan
- ☐ Test conditions and test design
- ☐ Test logs
- ☐ The test objects

Incorrect

0/1 Points

14

Which of the following statement is **correct** about quality control, quality assurance and testing

- ☒ Quality assurance focus on process-oriented activities whereas quality control and testing focus on product-oriented activities.
- ☐ Quality assurance and testing are corrective activities whereas quality control is preventive activities
- ☐ Quality assurance is the subset of quality control
- ☐ Quality control is the subset of testing

Incorrect

0/1 Points

15

Test automation is the development of tests, usually using scripts or special script-generating tools, to simulate user actions on a GUI. why we should automate our tests?

- ☒ Some manual tests take a long time to run, if they concern stable features, they can be automated.
- ☐ Automating a test can bias test design and construction in favor of automation rather than bug finding
- ☐ Some testers have little programming expertise
- ☐ There will be few releases and little repetition of manual tests

Correct

1/1 Points

16

Among the following one is **not** the cost of test automation:

- ☐ The cost of training staff to use the tool
- ☐ The cost of creating the automated tests

- ☐ The cost of maintaining the automated tests
- ☐ None of the above

Incorrect

0/1 Points

17

A test-design specification should address the following except:

- ☐ Testing approach
- ☐ Overall pass/fail criteria
- ☒ Execution description
- ☐ Test environment

Correct

1/1 Points

18

An attribute of reporting the defect to the developer which is related to defect fixing urgency and could be High/Medium/Low based on the impact urgency at which the defect should be fixed.

- ☐ Defect priority
- ☐ Defect severity
- ☐ Defect description
- ☐ Defect status

Correct

1/1 Points

19

A types of test selection guidelines for automation in which test case is stable and is unlikely to change over time and, it is expected that the test steps and the pass –fail criteria are not likely to change any more.

- ☐ Less Volatile
- ☐ Repeatability
- ☐ High Risk
- ☐ Easy to Automate

Incorrect

0/1 Points

20

A characteristics of automated test cases, in which the test steps are built to be configurable, that is, variables should not be hard coded

- ☐ Modular
- ☐ Robust and Reliable
- ☒ Reusable
- ☐ Independent and Self-Sufficient

Correct

1/1 Points

21

A type of nonfunctional testing that is a form of deliberately intense or thorough testing used to determine the stability of a given system or entity.

- ☐ Performance Testing
- ☐ Load Testing
- ☐ Volume Testing
- ☐ Stress Testing

Incorrect

0/1 Points

22

One of the following a types of maintainability testing in terms of effort required to effect a change, that maintainability of a system can be measured in terms of the effort taken to make required enhancements to that system

- ☐ Corrective maintenance
- ☒ Perfective maintenance
- ☐ Adaptive maintenance
- ☐ Preventive maintenance

Correct

1/1 Points

23

A type of testing to verify that software is capable of performing a failure-free operation for a specified period of time in a specified environment

- ☐ Scalability Testing
- ☐ Portability Testing
- ☐ Reliability Testing

Install-ability testing

Correct

1/1 Points

24

Among the following one is not a characteristics of good test case

Test cases should/can be repeated

Test cases need to be simple and transparent

Create test case with end user in mind

Test cases must be identifiable.

Correct

1/1 Points

25

Testing activity which is performed to expose in the interface and in the interaction between integrated components is

Unit level testing

Integration level testing

System level testing

User acceptance levels testing

Correct

1/1 Points

26

One of the following statements is **not correct** about system testing?

The application is tested in an environment that is different from the environment where the application will be deployed

The application is tested in an environment that is similar to the environment where the application will be deployed

Enables the testers to test, verify, and validate the business requirements as well as the application architecture

To verify the functional and technical specifications of the software, comprehensive testing is performed

Incorrect

0/1 Points

27

There are different test deliverables at every phase of the software testing process, these are before testing, during testing and after testing, so which one of the following deliverables are provided after the testing cycles is over

- ☐ Test design specifications
- ☒ Defect report
- ☐ Test scripts
- ☐ Test traceability matrix

Incorrect

0/1 Points

28

Change management systems deal with changes in project processes, baselines, etc. Configuration management systems deal with the changes in product characteristics. Which of the following statements is true regarding change management and configuration management systems?

- ☐ The configuration management system is a subset of the change management system
- ☒ The change management system is a subset of the configuration management system
- ☐ The configuration management system and the change management system are not related to each other
- ☐ None of the above

Incorrect

0/1 Points

29

You have been developing a next generation electric engine for high-speed electric trains. The project is 25% completed, you have spent 21% of your budget and you are slightly behind the schedule. The client is worried and asks you to provide him with the progress and forecasting report as soon as possible. So, you start collecting information such as the start and finish dates of scheduled activities, number of change requests, number of defects, actual costs, actual durations, etc. These are examples of:

- ☐ Work performance measurements
- ☒ Work performance data
- ☐ Work performance information
- ☐ Parameters

Correct

1/1 Points

30

You are working on a project to set up a call center for your client. The duration of the project is two years. One year has passed, however, only 40% of the work has been completed against the schedule, which says that by now 50% of the work should have been completed. To date, you have spent 60% of the budget. What is the cost performance index of the project?

- ☐ 1.25
- ☐ 1.5
- ☐ 0.8
- ☐ 0.67

Incorrect

0/1 Points

31

You have been given a project to build a park for a local community. Currently you are developing approaches to involve project stakeholders based on their needs, expectations, interests, and potential impact on the project. Which of the following is not an output of this process?

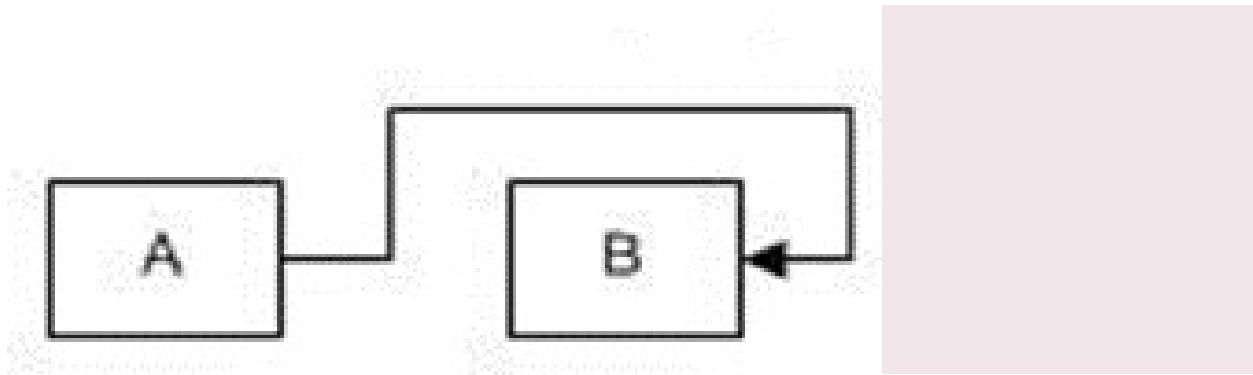

- ☐ Communication management plan
- ☐ Risk register
- ☐ Stakeholder register
- ☒ None of the above

Incorrect

0/1 Points

32

What kind of dependency is shown in the given exhibit?

- ☐ Start to Start (SS)
- ☐ Finish to Start (FS)
- ☒ Finish to Finish (FF)
- ☐ Start to Finish (SF)

Incorrect

0/1 Points

33

A project manager has some authority to manage the budget; however, he does not have any full-time employees under him. In what type of organization is he working?

- ☐ Strong matrix
- ☐ Weak matrix
- ☒ Balanced matrix
- ☐ Projected

Incorrect

0/1 Points

34

Your team has 10 members, including you. Two new members are added to it. How many have the lines of communication increased?

- ☐ 111
- ☐ 66
- ☐ 45
- ☒ 21

Incorrect

0/1 Points

35

You are reviewing an old project file where you find a document which contains the project description, important requirements, milestones, and project budget. What document is it?

- ☐ Scope statement
- ☒ Project charter
- ☐ Scope baseline
- ☐ Procurement document

Correct

1/1 Points

36

You are managing a multi-year project whose budget is 500,000 Birr. The cost variance is -45,000 Birr, the actual cost is 200,000 Birr, and the planned value is 140,000 Birr. Based on the above data which statement is correct?

- ☐ The project is behind schedule
- ☐ The project is ahead of schedule
- ☐ The earned value is 245,000 Birr
- ☐ None of the above

Correct

1/1 Points

37

You are a PMP and you have managed numerous projects. You have sound knowledge of project management tools & techniques and your team members respect your knowledge and experience. Which of the following powers do you possess?

- ☐ Referral power
- ☐ Expert power
- ☐ Formal power
- ☐ Penalty power

Correct

1/1 Points

38

You have just been given a project and management wants to know the lump-sum cost of the project. Therefore, you give them the rough order magnitude estimate. What is the range of the rough order magnitude estimate at the Initiation phase of the project?

- ☐ (-25) to (+75%)
- ☐ (-10) to (+10%)
- ☐ (-50) to (+50%)
- ☐ (-25) to (+25%)

Incorrect

0/1 Points

39

You are working in a project to analyze the impact of pollution on human life, and you have drawn a network diagram for this project. Which type of relationship have you used in this network diagram?

- ☐ Start to Finish
- ☐ Start to Start
- ☒ Finish to Start
- ☐ All of the above

Correct

1/1 Points

40

You have been given a research project to develop a new medication to treat an infection. You are in the process of calculating the duration of the project. As this is a unique project and the calculation of activity duration is not easy, you ask experts to come up with several possible duration estimates for each activity so you can find the average duration. In this scenario, which technique will you use?

- ☐ EVM
- ☐ CPM
- ☐ EMV
- ☐ PERT

Correct

1/1 Points

41

Abebe and Alemu are having some conflicts and they come to you. Since you are too busy and the problem is complex, you go with the midway of both parties and partially satisfy both of them. What conflict resolution technique are you using here?

- ☐ Accommodate
- ☐ Withdraw
- ☐ Collaborate
- ☐ Compromise

Incorrect

0/1 Points

42

You open a new hotel in Dessie. You are new to this area and do not have experience in catering services. You are discussing whether you should provide your own catering service for your customers or to outsource it from another caterer who is experienced. They are guaranteeing their service and ready to accept a fine if they fail to serve your customers in a timely manner. Since their offer is lucrative, you decline starting your own catering service for customers and accept their offer. What kind of risk response strategy is this?

- ☐ Accept
- ☐ Avoid
- ☒ Transfer
- ☐ Exploit

Incorrect

0/1 Points

43

In which network diagrammatic technique do you assume that the resources will always be available whenever they are needed?

- ☒ CPM
- ☐ PERT
- ☐ CCM
- ☐ All of the above

Incorrect

0/1 Points

44

You have been hired as a consultant for a project that is in trouble. You meet the project manager and ask several questions regarding the project budget, the project end date, etc. The project manager was not able to answer some of these questions properly, so you decided to verify them yourself. What document will you refer to in order to verify such facts?

- ☐ Project management plan
- ☐ Cost and schedule baselines
- ☒ Project charter
- ☐ Performance report

Incorrect

0/1 Points

45

You are managing a project whose budget is 150,000 Birr. To date, you have spent 25% of your budget and have earned 28,000 Birr of the project, though according to the schedule you should have earned 42,000 Birr. What is the percentage of work completed?

- ☐ 25%
- ☒ 18.7%
- ☐ 28%
- ☐ 46.7%

Correct

1/1 Points

46

You have been given a project to develop some gaming software for the client. You have developed many similar games in the past and possess the knowledge and skills that are needed to build the game. You have recruited your team and many of them are new, however all of them respect you a lot. What kind of power are you showing here?

- ☐ Coercive power
- ☐ Positional power
- ☒ Expert power
- ☐ Referent power

Incorrect

0/1 Points

47

You have joined an ongoing project which is 25% completed. As the project is big, to understand its activities you started reviewing a network diagram. The network diagram is complex and contains many dummy activities. Which network diagram technique is used to draw this chart?

- ☒ PERT
- ☐ Pareto diagram
- ☐ CPM
- ☐ Critical chain

Correct

1/1 Points

48

Your project is 60% complete and while reviewing the lessons learned document you notice that it has missed a few lessons you have learned recently. You call all your team members and tell them to update the lessons learned as they happen. On any project, who is responsible for updating the lessons learned?

- ☐ Project manager
- ☒ Project management team
- ☐ Quality control personnel
- ☐ Quality assurance personnel

Incorrect

0/1 Points

49

You are developing a video game for a client. The cost of the project is 250,000 Birr. To date, you have spent 100,000 Birr and you have completed the 30% of the project. Upon a review of the project, you find that, due to an error, you are over budget and from now onward you can move ahead as planned. What is the EAC of the project?

- ☐ 425,000 Birr
- ☐ 357,142 Birr
- ☐ 225,000 Birr
- ☒ 275,000 Birr

Incorrect

0/1 Points

50

The client needs a small modification in the project scope, and he discusses it with you. He has told you that this may not increase the cost and may actually save some money. What will your next step be?

- ☐ Approve it
- ☐ Reject it
- ☐ Discuss it with the management
- ☒ Review it

Correct

1/1 Points

51

Which of the following is **not** included under agile software development process?

- ☐ start with kick off meeting
- ☐ Test driven development
- ☐ Refactoring
- ☒ None

Incorrect

0/1 Points

52

Which of the following are **not** common characteristics of all agile methods / techniques?

- ☒ The process of specification, design and implementation are separated
- ☐ The system is developed in series of increments
- ☐ Using of extensive tool support
- ☐ None

Correct

1/1 Points

53

Why software project management important?

- ☐ Strategic alignment
- ☐ Quality control
- ☐ Leadership
- ☒ All

Correct

1/1 Points

54

Mulugeta is a risk manager in INSA's Voice over IP project; he has an activity with an optimistic estimate 10 days, pessimistic estimate 16 days, and most likely estimate 13 days, according to Triangular Distribution, What is the estimated duration for the activity.

- ☒ 13 days
- ☐ 16 days
- ☐ 10 days
- ☐ 78 days

Correct

1/1 Points

55

Which of the following is **not** categorized under project estimation technique?

- ☐ Top-down estimation
- ☐ Bottom-up estimation
- ☐ Parametric estimation
- ☒ None

Incorrect

0/1 Points

56

What are the types of software design depends on specific design methodology being used

- ☒ Function/object oriented
- ☐ High/low level
- ☐ A and B
- ☐ None

Incorrect

0/1 Points

57

Which of the following are **not** software design principles?

- ☐ Linguistic modular unit
- ☐ Small interface

- ☐ Few interface
- ☒ Implicit interface

Incorrect

0/1 Points

58

Which of the following cohesion level combination is correct?

- ☐ Coincidental-strong
- ☐ Sequential-weak
- ☐ Logical association-medium
- ☒ Communicational-medium

Incorrect

0/1 Points

59

which one of the following assesses the scope of assignments done and measures the productivity of software development teams.

- ☐ Size-Oriented Measurements
- ☒ Production Metrics
- ☐ QA Metrics
- ☐ Agile Metrics

Correct

1/1 Points

60

Which one of the following is not goal of coding

- ☐ To translate the design of system into computer language format
- ☐ To reduce the cost of testing and maintenance phases
- ☒ To translate the SRS document to design document
- ☐ Making the program more readable understandable

Incorrect

0/1 Points

61

In which process model the project risk factor is considered?

- ☐ Spiral
- ☐ Incremental

- ☒ Waterfall
- ☐ Evolutionary

Correct

1/1 Points

62

Which one of the following is not related to issues of professional responsibilities of Software Engineers?

- ☐ Confidentiality
- ☐ Competence
- ☐ Intellectual property rights
- ☒ Dependence

Incorrect

0/1 Points

63

Which one is not factors that have contributed to the making of the present software crisis

- ☐ larger problem sizes
- ☐ inadequate training
- ☐ decreasing skill shortage
- ☒ Low productivity improvements

Correct

1/1 Points

64

A type of software that can control and manage hardware devices

- ☐ Personal Application Software
- ☐ Communication Software
- ☐ Business information
- ☒ Embedded Software

Correct

1/1 Points

65

which of the following implies the software must evolve to meet changing customer needs

- ☒ Evolution

- ☐ Development
- ☐ Validation
- ☐ Design

Correct

1/1 Points

66

which of the following is expanded versions of the user requirements that are used by software engineers as the starting point for the system design.

- ☒ System requirements
- ☐ User Requirement
- ☐ Functional Requirement
- ☐ Nonfunctional Requirement

Correct

1/1 Points

67

In which testing phase is individual components are tested

- ☐ Module Testing
- ☐ System Testing
- ☐ Acceptance Testing
- ☒ Unit Testing

Correct

1/1 Points

68

which of the following is the process of establishing what services are required and the constraints on the system's operation and development

- ☐ Software Validation
- ☐ Software Implementation
- ☒ Software Specification
- ☐ Software Design

Incorrect

0/1 Points

69

which one of the following is designed to run a computer's hardware and application programs.

- ☐ Embedded Software Software
- ☒ System Software
- ☐ Business Information
- ☐ Communication Software

Incorrect

0/1 Points

70

which of the following process model is risk-driven process model

- ☒ Spiral Process Model
- ☐ Waterfall Model
- ☐ Evolutionary Development Model
- ☐ Incremental Development Model

Correct

1/1 Points

71

which of the following processes transform the specification to an executable program.

- ☐ Design and Specification
- ☐ Validation and Evolution
- ☐ Feasibility Study and Implementation
- ☒ Design and Implementation

Correct

1/1 Points

72

which of the following is the subset of systems engineering concerned with discovering, developing, tracing, analyzing, qualifying, communicating and managing requirements that define the system at successive levels of abstraction.

- ☒ Requirement Engineering
- ☐ Software Engineering
- ☐ System Engineering
- ☐ System Analysis

Incorrect

0/1 Points

73

Which one is not the advantage of Spiral Process Model

- ☒ suitable for small and low risk projects
- ☐ Good project visibility.
- ☐ Flexible
- ☐ Realism

Incorrect

0/1 Points

74

which one of the following is an attempt to accomplish a specific objective through a unique set of interrelated tasks and the effective utilization of resources

- ☐ Scope
- ☐ Project Management
- ☒ Human Resource
- ☐ Time

Correct

1/1 Points

75

Any entity external to the object would have no knowledge about how data is exactly stored, organized, and manipulated inside the object. This concept implies?

- ☐ Data Structure
- ☒ Data abstraction
- ☐ Data type
- ☐ Inheritance

Incorrect

0/1 Points

76

You are using a technique involving the project's risk and uncertainty to find the probability of completing the project under different situations. What process is this?

- ☐ Estimate activity duration
- ☐ Perform qualitative risk analysis

- ☒ Develop schedule
- ☐ Perform quantitative risk analysis

Incorrect

0/1 Points

77

You are constructing an application. The cost of this project is 200,000 Birr, and the duration of the project is 8 months. During the performance review in the sixth month, you find that 65% of the work is completed and the cost performance index is 1.3. The Planned Value (PV) will be:

- ☒ 150,000 Birr
- ☐ 130,000 Birr
- ☐ 70,000 Birr
- ☐ 266,666

Correct

1/1 Points

78

You have been assigned a very critical project. Although your team members are experts and efficient, your team performance is poor. What will you do to improve your team performance?

- ☐ Train them
- ☐ Warn them
- ☒ Co-locate them
- ☐ Punish them for poor performance

Correct

1/1 Points

79

You are developing a product for your client. During the development of the product, the client has indicated that he needs some changes in the product, so you process his request. How do you manage changes in product specification?

- ☐ Change management
- ☐ Integration management
- ☐ Product management
- ☒ Configuration management

Correct

1/1 Points

80

Your organization manages many projects at one time. For your project, you have been assigned a place in a building to utilize for your project related activities. However, to use this facility, you have to pay the electricity bill which is distributed to all project teams. This electricity bill is an example of:

- ☐ Direct cost
- ☒ Indirect cost
- ☐ Variable cost
- ☐ Fixed cost

Incorrect

0/1 Points

81

You have been assigned as a project manager for an ongoing project. While reviewing the project documents you notice that the project does not have a risk management plan. What will your next step be?

- ☐ As the project has already started, you will do nothing
- ☐ Ignore the risk management plan
- ☒ Start developing the risk management plan
- ☐ Inform the stakeholders

Incorrect

0/1 Points

82

Your organization has received two possible projects. The first project will give you 50,000 Birr profit but it is a bit time consuming, and the second project will give you 35,000 Birr and it will complete earlier than the first project. Therefore, you select the second project. What is the opportunity cost of selecting the second project?

- ☒ 50,000 Birr
- ☐ 35,000 Birr
- ☐ 85000 Birr
- ☐ 15,000 Birr

Incorrect

0/1 Points

83

You are managing two projects. The first project is to design and develop a school website, and the second project is to develop a website for your company's employees. What is your current role?

- ☐ Project manager
- ☐ Program manager
- ☐ Portfolio manager
- ☐ None of the above

Incorrect

0/1 Points

84

You have been appointed as project manager for an ongoing project. Upon reviewing the project documents, you notice that a WBS was not created and work is moving ahead without it. What will your next step be?

- ☐ You will continue to work without a WBS
- ☐ Start developing the WBS immediately
- ☐ Inform the customer
- ☒ Investigate why the WBS was not developed

Correct

1/1 Points

85

Which one of the following is concerned with understanding how a software system should be organized and designing the overall structure of that system?

- ☐ Low level design
- ☒ High level design
- ☐ Coding
- ☐ Function Oriented Design

Correct

1/1 Points

86

Which of the following is an engineering discipline that is concerned with all aspects of software production from the early stages of system specification through to maintaining the system after it has gone into use

- ☐ Requirement Engineering

- ☒ Software Engineering
- ☐ Software Project Management
- ☐ All

Correct

1/1 Points

87

Many more projects are fail due to

- ☐ the size of the project relative to previous efforts
- ☐ key personnel have left
- ☐ failure to understand requirements
- ☒ All

Correct

1/1 Points

88

Which of the following is not characteristics of software?

- ☐ Software is developed or engineered
- ☒ Software does wear out
- ☐ Software is easy to reproduce
- ☐ Software does deteriorated

Incorrect

0/1 Points

89

The goal of system design is not to decode

- ☐ "What the modules are?"
- ☐ "What the modules should be?"
- ☐ "How the modules interact with one-another?"
- ☒ "What the analysis model should be?"

Correct

1/1 Points

90

Why we need software process model?

- ☐ The development team must identify a suitable software process model for the particular project and then adhere to it.

- ☐ Without using of a particular software model the development of a software product would not be in a systematic and disciplined manner.
- ☐ A software process model defines entry and exit criteria for every phase.
- ☒ All

Correct

1/1 Points

91

Assume you are working in small project that starts with an informal general product idea and just develops code until a product is "ready" (or money or time runs out). The work is in random order, no administrative overhead and the product is constructed without specifications or any attempt at design. Which one of the following software process model is best preferable for this project?

- ☐ Waterfall software process model
- ☒ Code and fix software process model
- ☐ Spiral software process model
- ☐ V-shape software process model

Correct

1/1 Points

92

Assume you are working in the short duration project which have well understood requirements in order to automation of existing manual systems. Which one of the following software process model is best preferable this project?

- ☒ Waterfall software process model
- ☐ Code and fix software process model
- ☐ Spiral software process model
- ☐ V-shape software process model

Correct

1/1 Points

93

Which of the following is not happened during regression testing?

- ☒ New test cases are designed

- ☐ Test are selected, prioritized and executed.
- ☐ To ensure that nothing is broken in the new version of the software
- ☐ Performed whenever a component of the system is modified

Correct

1/1 Points

94

Which of the following type of testing is to appropriately select a few paths in a program unit and observe whether or not the selected paths produce the expected outcome.

- ☐ Data Flow Testing
- ☒ Control Flow Testing
- ☐ Code Coverage Testing
- ☐ None

Correct

1/1 Points

95

In Black Box Testing, the functionality of the software under test is checked without looking:

- ☐ at the internal code structure.
- ☐ Implementation detail.
- ☐ knowledge of internal paths of the software.
- ☒ All

Correct

1/1 Points

96

Which of the following refers the change to a version that corrects only errors in the design/code, but does not affect the documented functionality.

- ☐ Version
- ☒ Revision
- ☐ Release
