Answered Review

8. Sample survey is advantageous over census due to the following reasons except:-

- A. Its costs can be greatly reduced
- B. It is easily to manage
- C. It is simple to administer
- D. Its inadequacy of coverage

Incorrect

7. All of the following events of population could be belongs to a vital registration except:

A. Abduction

B. Marriages

C. Divorces

D. Adoptions

Incorrect

30. The preparation of an appropriate research design for a particular problem do not involves:-

A. The means of obtaining the information

B. The competence of the researcher

C. The competence of the research advisor

D. The money available for the research

Incorrect

23. Which one of the following question expresses little about geographic research problem than the others?

A. To what extent is the population density differentiated across place and time?

B. What is the number of students joined the department of geography in 2015?

C. How does agricultural productivity relate to the surrounding area and situation?

D. Are spatial processes important to any development distribution and pattern?

Incorrect

9. Which one of the following indicators measures the total number of births occurring in a given year, per 1000 population?

A. Total Fertility Rate

B. Crude Birth Rate

C. General Fertility Rate

D. Rate of Natural Increase

Incorrect

14 . All necessitate the hydrological study except

A. Uncertainty of PPT

B. Increased water demand

C. Global climate change

D. Sustainability in water resource

E. All

Incorrect

32. Which of the following is not belongs to reasons for review of the related literature during research work?

A. Carrying on from where others have already reached

B. Replicating from where others have already reached

C. Identifying other people working in the same fields

D. To identify methods that could be relevant to the research

Incorrect

55. Which of the following approaches Concerned with the ecological and environmental organizations, relationships, functions and interactions within and between natural resources and with that of humans and their activities?

A. Regional Approach

B. Resource Approach

C. Systematic Approach

D. Environmental Approach

Incorrect

94. All of the following can be used as indicators of development except

- A. Gross National Product (GNP)
- B. Literacy
- C. Gross Domestic Product(GDP)
- D. Gross National Migration(GNM)

Incorrect

95. Which one of the following action is the first step in the formulation of development planning process?

- A. Identifying and evaluating alternative
- B. Analysis of the environment
- C. Setting the objectives
- D. Budget formulation

Incorrect

72. Which one of the following is not the major dimension of human development index, as a composite index focusing on basic dimensions of human development?

- A. Literacy rate
- B. Life expectancy
- C. GNP per capita
- D. Gross Domestic Product (GDP)

Incorrect

39. From the functions of a database the one is supporting the use of query language. What is Query language function mean?

- A. Function to ensure data availability at all times

- B. Function that defines a database structure and manipulate the data stored in it
- C. Function that uses to extract data from the database
- D. Function supports concurrent use by multiple users at the same time

Incorrect

66. According to W.W.Rostow, which of the following does not belong to the “precondition for takeoff”?

- A. Increased agricultural productivity,
- B. Political stability,
- C. Development of social overhead capital,
- D. Growth of the durable consumer goods industry

Correct

43. Platforms for remote sensors may be situated on the following except?

- A. On the ground
- B. In the space
- C. Within the atmosphere
- D. In the ground

Incorrect

88. Which of the following is one of the five themes of cultural geography that involves providing references to describe where on the Earth a thing being studied is?

- A. Human-environment interaction
- B. Place
- C. Location
- D. Region

Incorrect

71. ____ refers to any movement of the actor's head, shoulder, arm, hand, leg, or foot to convey meaning.

- A. Costume
- B. Gesture
- C. Facial expression
- D. Dialogue

Correct

76. The planning process which involves operations in shorter-term, specific to work toward goals of development is referred as:

- A. Strategic plans
- B. Tactical plans
- C. Operating plans
- D. Project plans

Incorrect

77 . —— is a chain of causally related events that gives a novel continuity, pace and thematic significance.

- A. Plot
- B. Conflict
- C. Theme
- D. Point of view

Incorrect

54. Which one of the following is the process of planting or restocking with trees of a former, forested area which may have been cleared or burnt?

- A. Afforestation
- B. Reforestation
- C. Browsing
- D. None

Correct

42. Of the following spectral bands which combination is useful for remote sensing imagery?

- A. Ultraviolet & X-ray
- B. Infrared & Gamma ray
- C. Radio wave & Visible
- D. Micro wave & Visible

Incorrect

99. Which of the following is closest in meaning to poaching as it used in paragraph 6?

- A. Protecting
- B. Conserving
- C. Deteriorating
- D. Hunting illegally

Incorrect

49. The type of weathering that involves the weakening and subsequent disintegration of rock by plants, animals and microbes is-

- A. Chemical weathering
- B. Biological weathering
- C. Physical weathering
- D. None

Incorrect

53. What is it called when sediment is moved by wind, water, ice, and gravity?

- A. Erosion
- B. Deposition
- C. Weathering
- D. Landslides

Incorrect

37. Which one of the following combinations is incorrect about the GIS data models?

- A. Raster — Simple data structure
- B. Vector — Application for network analysis
- C. Raster — Easy and efficient overlaying
- D. Vector — Compatible with remotely sensed imagery

Incorrect

44. Which one of the following is correct about Rayleigh scattering?

- A. It occurs when particles are smaller than the wavelength of the radiation.
- B. It causes longer wavelengths of energy to be scattered much more than longer wavelengths
- C. It is the dominant scattering mechanism in the lower atmosphere.
- D. It occurs when the particles are just about the same size as the wavelength of the radiation.
- E. It occurs when the particles are much larger than the wavelength of the radiation

Incorrect

25. The type of research in which its investigation and analysis focuses on a better understanding of a subject or a basic law of nature instead of on a specific practical application of the result is termed as:

- A. Historical research
- B. Basic research
- C. Action research
- D. Applied research

Incorrect

80. Which one of the following is not natural cause of climate change?

- A. Volcanic eruption
- B. Tectonic processes
- C. Meteorites
- D. Deforestation

Incorrect

31. Which of the following is hardly used as criteria for selecting a research topic?

- A. Size of the research report
- B. Avoidance of duplication
- C. Feasibility of study
- D. Ethical acceptability

Incorrect

75. The theory of development which suggests developing countries to focus on import substitution seeking to develop domestic industries to produce goods that are currently imported and using import tariffs to protect their industries is:

- A. Core-periphery model
- B. Cumulative causation theory
- C. Modernization theory

D. Dependency theory

Incorrect

12. Which one of the following is incorrect about secondary economic activities?

A. Service delivering sector of the economy

B. All of manufacturing, processing, and construction lies within this sector

C. Activities in this sector include metal working and smelting, automobile production

D. The secondary sector of the economy manufactures finished goods

Incorrect

82. One of the following is the state of soil moisture is controlled

A. Soil characteristics

B. Rainfall

C. The evaporation rate

D. All the above

Incorrect

69. The idea which explains that poverty is self-perpetuating because poor nations are unable to save and invest enough to accumulate the capital stock that would help them grow is

A. The dependency theory

B. The vicious circle of poverty

C. The virtuous circle of poverty

D. The absolute poverty hypothesis

D. The absolute poverty hypothesis

Correct

10. Which of the following is NOT true about major philosophic approaches in economic

geography?

- A. Humanism values subjective experience
- B. Structuralism posits that what we see in the world does not reveal the causes of what we see
- C. Positivism employs the individual feelings to interpret and understand issues
- D. Humanism is an ideology which supports the behaviors of the people

Correct

1. A population pyramid is a drawing that shows population distribution by:

- A. Age group and death rate
- B. Sex and birth rate
- C. Sex and age group
- D. Age group and growth rate

Incorrect

18. Which one of the following is Not true about determinant factors of runoff?

- A. The high rainfall intensity yields higher runoff and vice-versa.
- B. If rainfall intensity is greater than the infiltration rate of the soil, then the surface runoff takes place very shortly
- C. Rainfall duration is inversely related to the volume of runoff
- D. For a given total rainfall, if all other conditions are the same, then greater the value of distribution coefficient, greater will be the runoff and vice-versa.

Incorrect

24. All of the following belong to the typical data collection in qualitative research approach except:-

- A. Questionnaire

- B. Introspection
- C. Participant observation
- D. Semi-structured interviews

Incorrect

6. Which one of the following is the smallest settlement cluster than all of the others?

- A. Town
- B. Hamlet
- C. Metropolis
- D. City
- E. Megalopolis

Incorrect

35. Which one of the following is incorrect statement about GIS?

- A. GIS is cheap and has very fast application
- B. GIS works with data referenced by geographic coordinates
- C. GIS supports storage of very large data sets
- D. The main function for a GIS is the analysis of spatial data

Incorrect

52. What happens when rain falls on soil without vegetation cover?

- A. Rainwater percolates in soil efficiently
- B. Rainwater causes loss of surface soil
- C. Rainwater leads to fertility of the soil
- D. Rainwater does not cause any change in soil

Incorrect

34. Which one of the following is incorrect about the raster data model?

- A. A powerful format for intense statistical and spatial analysis.
- B. The ability to uniformly store points, lines, polygons, and surfaces.
- C. Capability to perform faster overlays (than vector datasets) with complex data.
- D. Easily for making projection and coordinates transformation.
- E. Compatible with remote sensing images and all results images of spatial data scanning.

Incorrect

16. If stations X, Y, and Z have the PPT of 15mm, 10mm, and 25mm, with respective area of 10 sq km, 12sq.km and 8sqkm respectively. Calculate the areal mean RF, using Thiessen polygon method and draw the polygon.

- A. 18.9
- B. 118.7
- C. 236.77
- D. 15.67
- E. None

Incorrect

60. One of the following is not a renewable natural resource?

- A Coal
- B. Forest
- C. Soil
- D. Water

Incorrect

2. If the birth rate of a population is 50/1000, and the death rate is 30/1000, then the natural increasing rate is equal to:

- A. 8%
- B. 80%
- C. 2%
- D. 70%

Incorrect

84. Which one of the following is not effect of ozone layer depletion?

- A. Skin cancer
- B. effects on Human immunity
- C. Unregulated Launches of Rockets
- D. Effect of Food Shortage on Human Population

Incorrect

40. How much scattering takes place is depending on the following factors except?

- A. The wavelength of the radiation
- B. The abundance of gases in the atmosphere
- C. The distance the radiation travels through the atmosphere
- D. The orientation of the earth

Incorrect

68. The existence of two separate/distinct economic systems which involves a capitalist based manufacturing sector and labor intensive agricultural sector is referred as:

- A. Mixed economy

- B. Developed economy
- C. Dualistic economy
- D. Under developed economy

Incorrect

70. The Gini coefficient provides a measure of:

- A. The level of poverty
- B. The level of relative inequality
- C. Disguised unemployment
- D. The rate of growth

Correct

79. Which one of the following is not a distinctive feature of ADL (Agricultural development leads industrialization) as one development strategies in Ethiopia?

- A. Industrialization plays a major role in the economic development.
- B. Commercialization of smallholder agriculture.
- C. Promotion of niche high-value export crops.
- D. Increasing the productivity of small scale farmers.

Incorrect

74. Which one of the following is the central idea of Modernization theory of development?

- A. Under development is the result of internal problems of the countries.
- B. Under development is the influence of external funds and expertise.
- C. Under development is the result of external source of exploitation.
- D. Modernization is revolutionary change.

Incorrect

78. Which one of the following is political factor affecting economic development of certain nation?

- A. Capital accumulation
- B. Access to natural resources
- C. Access to technology
- D. Level of corruption

Incorrect

98. Which one of the following is hardly true about development?

- A. Development brings economic growth
- B. Development brings overall national progress
- C. Development is an independent and subordinate process
- D. Development is a dependent and subordinate process

Incorrect

85. The majority of atmospheric ozone gas is found in the atmospheric layer

- A. Troposphere
- B. mesosphere
- C. thermosphere
- D. Stratosphere

Incorrect

3. All of the following are belongs to direct anti-natalist population policy measure except:

- A. Restricting out-migration
- B. Providing free family planning services

C. Increasing taxes for each additional child

D. Raising the age of marriage

Incorrect

11. Which of the following is NOT a main factor which is identified by Alfred Weber as an influence on industrial location:

A. Labour costs

B. Transport costs

C. Agglomeration economies

D. Management costs

Incorrect

5. The isolation or dispersion character of human settlements is described as _____

A. Size of the settlement

B. Hierarchy of the settlement

C. Pattern of the settlements

D. Shape of the settlement

Incorrect

89. Cultural Assimilation occurs

A. When a culture is removed from a society

B. When a culture spreads from one society to another

C. When someone adopts a new culture and loses their old culture.

D. When a culture combines with another culture

Correct

97. Which one of the following is not among the areas of emphasis by development geography?

- A. Locations of development
- B. Geographical scales of development
- C. Assisting political parties for development
- D. Regions of development

Incorrect

41. Which one is incorrect about the following sentences?

- A. Active sensors can be operated day and night
- B. Passive sensors have controlled illuminating signal
- C. Active sensors depend on an external source of energy
- D. Active sensors can use thermal energy of the earth

Correct

Suppose a catchment six rainguage stations with annual RF record of 80.7, 98.2, 68.3, 78.4, 65.8, and 102.6 respectively, and 10% error, catchment.

20. Calculate the optimum number of the gauges in the catchments is approximately:

- A. 18
- B. 4
- C. 82
- D. 15

Incorrect

83. Which one of the following is the result of climate change water-borne infectious diseases?

- A. Cholera

B. Trachoma

C. Yellow fever

D. Malaria

Incorrect

15. Most dissolved material found in water includes all except

A. Potassium

B. Nitrogen

C. Magnesium

D. Sodium chloride

E. Calcium

Incorrect

90. Which one of the following statements best describes social change over time?

A. Transformations of culture and social institutions

B. Transformations of religion and politics

C. Transformations of families and small towns

D. Transformations of the economy and society

Incorrect

38. Which statement is incorrect about a database?

A. Database can deal with multiple users at the same time

B. Database packages can store large quantities of data as well

C. Database has easy to use data manipulation language

D. Database knows about spatial reference systems

Incorrect

50. Which of the following is a recently originated problem of environment?

A. Ozone layer depletion

B. Greenhouse effect

C. Global warming

D. All of the above

Incorrect

17. Which one of the following isn't the unique feature of water?

A. High surface tension

B. High specific heat energy

C. Conduct heat even more than mercury

D. Universal solvent

Incorrect

73. The reverse of the core- periphery model which shows the condition of flow of capital, labor, investment and economic activities away from less accessible inner city areas and becoming concentrated close to core central business district is referred as:

A. Trickle-down effect

B. Back wash effect

C. Spread effect

D. Diffusion effect

Incorrect

45. Why the sky is appearing red color to our eyes during the sunset/sunrise time?

- A. Because of more reflectance of the red wavelength
- B. Because of less reflectance of the blue wavelength
- C. Because of more observation of the red wavelength
- D. Because of equal reflectance of blue, green and red wavelengths

Correct

56. Which one of the following is a Biological method of maintaining soil conservation?

- A. Afforestation
- B. Reforestation
- C. Growing trees
- D. All

Correct

100. Which one of the following development strategies aims in replacing imports by domestic products?

- A. Agricultural development strategy
- B. Export oriented industrialization
- C. Import substitution strategy
- D. Industrial development strategy

Incorrect

93. Which one of the following is not among the characteristics of most developing countries?

- A. Lower Rural Populations
- B. Lower levels of industrialization
- C. Lower levels of human capital
- D. Lower levels of living standard

Incorrect

65. Which one of the following is not the component of gross national product (GNP)?

- A. Government expenditure
- B. Personal consumption expenditure
- C. Private domestic investment
- D. Private foreign investment

Incorrect

92. Which one of the following hardly describes about development Geography?

- A. It explains about the spatial organization of the development
- B. It explains about the geographical unevenness of the development
- C. It explains about the characteristics of the "Periphery" merely
- D. It explains the basic characteristics of the "Core" and the "Periphery"

Correct

63. The dependency ratio is the ratio of:

- A. Children to adults in the population
- B. Unemployed to employed workers in the labor force
- C. Foreign aid to total GNP
- D. Non-working age group population to working age population

Incorrect

58. The occurrence of natural vegetation at any given area is influenced by;

- A. The amount of moisture and temperature

B. Relief feature of an area

C. Aspects

D. All of the above

Incorrect

61. The concept of opportunity cost is based upon the principle of

A. Need

B. Consumption

C. Scarcity

D. Profit

Incorrect

67. Which one of the following economic condition has tendency to decreases the country's gross domestic product (GDP)?

A. Construction of rail ways

B. Importing agricultural chemicals

C. Exporting agricultural products

D. Providing educational services to citizens

Correct

27. Which one of the following is belongs to the focus of geographical research?

A. The spatial distributions of phenomena and things

B. The interaction between human and environment

C. The patterns of human and physical phenomena

D. All of the above could be answer

Correct

64. According to Kuznets, the identifying characteristic of “modern economic growth” is

- A. Expansion of heavy industry.
- B. A rapid decline in population growth rates
- C. High rates of saving and investment
- D. Application of science to problems of economic production

Incorrect

91. Ethnic religions differ from universalizing religions in that

- A. they attempt to appeal all people of the world
- B. they have spread far beyond their hearths.
- C. they incorporate mechanisms such as missionaries and conversion procedures.
- D. they have an identity with a particular group of people living in particular environment.

Incorrect

60. From the following alternatives, which one is used to describe the progress of a country as it becomes economically advanced and improvements in people’s quality of life?

- A. Growth
- B. Development
- C. Industrialization
- D. Urbanization

Incorrect

48. All are the basic problems related to increasing destruction of wild animals in Ethiopia, except?

- A. Rapid expansion of farmlands, urbanization and industrialization
- B. Shortage of food and water because of recurring droughts

- C. Increasing of public awareness towards wild life
- D. Destruction of the wild life habitats due to deforestation

Correct

51. Top-soil contains the following

- A. Humus and living organisms only
- B. Humus and soil particles only
- C. Humus, living organisms and plants
- D. Humus, living organisms and soil particles.

Correct

59. From the following, one is not a water conservation technique?

- A. Constructing dam's
- B. Purifying polluted water for reuses
- C. Increasing the price of water
- D. Discharging waste to water storage areas

Incorrect

81. Which one of the following is not the orbital parameter of the earths' surfaces?

- A. The eccentricity of the orbit
- B. Tilt of the Earth's axis
- C. The positioning of the Earth's axis
- D. Meteorite
- E. None of the above

Incorrect

96. Which one of the following is not among the development strategies of Ethiopian government?

- A. Agricultural development
- B. Religion development
- C. Micro and small enterprises
- D. Mining development

Incorrect

36. All of the following are advantages of topological data model (structure) provide except?

- A. Automated way to correct errors
- B. Increase storage space
- C. Overlapping polygons
- D. Advanced spatial analysis
- E. Data entry and map production are improved

Incorrect

62. A certain amount of goods and services which is necessary for a minimum standard of living is referred to as:-

- A. Basic needs
- B. Luxurious needs
- C. Absolute poverty
- D. Relative poverty

Correct

13. Suppose stations A, B, C, D, E and F have the RF record of 31, 40, 20, 15, 25 and 45 respectively. What is the value of mean annual areal PPT using Arithmetic mean method?

A. 29.3

B. 20.5

C. 45

D. 24

E. None

Incorrect

33. Which subsystem of GIS uses DBMS for maintaining attribute data?

A. Data Storage and Retrieval

B. Data Manipulation and Analysis

C. Data input

D. Data presentation and Output

Correct

86. Which one of the following statements describes human culture correctly?

A. Human culture is entirely learned

B. Human culture is limited to relatively rich societies with sophisticated technologies

C. Human culture is inborn

D. Human culture is partly inherited genetically

Correct

4. Which one of the following factors adversely influences human settlement?

A. Availability of forests

B. Availability of rugged land surface

C. Availability of employment

D. Availability of common religion

Incorrect

19. Which one of the following is not categorized under physiographic factor which determine runoff?

A. Rainfall intensity

B. Shape of watershed

C. Drainage density

D. Soil moisture

Correct

87. The total knowledge, attitudes, behaviors shared by and passed on by members of a group refers

A. society

B. ethnic group

C. innovation

D. Culture

Correct

28. Which one of the following action comes first in the steps of geographic research than the others?

A. Specifying the research problem

B. Developing the research objectives

C. Preparing the research design

D. Determining sample design

Correct

47. Which one is true about the reflection of healthy vegetation during the summer season?

- A. Strongly observe radiation in the green wavelength but reflect the red and blue
- B. Strongly reflect radiation in the blue wavelength but observe the red and green
- C. Strongly reflect radiation in the red and blue wavelengths but observe the green
- D. Strongly observe radiation in the red and blue wavelengths but reflect the green

Incorrect

21. What is the principal goal of Scientific Research?

- A. Asking questionnaires scientifically
- B. Collecting appropriate data
- C. Solving societal problems
- D. Observations and experimentations

Correct

46. All of the following statements are correct except?

- A. Sensors which are designed to detect very detail information have fine resolution.
- B. Sun-synchronous such that they cover each area of the world at a constant local time
- C. Geostationary orbit satellites are positioned at maximum altitudes
- D. Coarser resolution sensors are seeing less total ground area

Incorrect

22. If a researcher is planned to collect data about student's participation in politics and reports their level of participation based on the data collected, which type of research is more appropriate for this specific case?

- A. Descriptive research
- B. Exploratory research
- C. Explanatory research

D. Experimental research

Incorrect

26. Which of the following is hardly true about quantitative research:

A. Quantitative research is usually based on the measurement of amount.

B. Quantitative research is generally associated with the positivist paradigm.

C. Quantitative research usually involves statistical calculations.

D. Quantitative research usually relies on the nonnumeric data

Incorrect

29. All of the following could be the reasons for not all questions can be transformed in to research problems except:

A. Lack of data for the identified question

B. Lack of prominence of the identified question

C. Lack of resource

D. Lack of expertise

Incorrect
